

## **175 - ALUMINIUM - ACRYLIC SECTIONAL DOORS**

### **FEATURES**

- Panel produced with extruded aluminium profiles and transparent acrylic windows, single or double sheeted, insulated with high density EPDM seals around entire perimeter.
- Total panel thickness: 40mm.
- Several combinations with sandwich panel (mod. 40AA/CA/LA).
- Safe-finger interlocking system preventing any trapping episodes during door's moving cycle.
- EPDM rubber embedded on the panel's seal bottom.
- Great visibility to the interior and use of sunlight.
- Made of Aluminium and acrylic components provide great durability and are tested against the most extreme environments.
- Inlay handle supplied with the door (T175 and T175T models).

### **AVAILABLE FINISHES**

- Default finishing: natural colour aluminium profiles, standard colour sandwich panels and single acrylic.

For any other RAL finish, please consult (available fine-tuned option).
