

40CA - RIBBED ALUMINIUM SECTIONAL DOORS

FEATURES

- Sandwich panel, in sections of 500 or 610mm height and thickness of 40mm; Interior of high density expanded polyurethane, CFC free.
- Safe-finger interlocking system preventing any trapping episodes during door's moving cycle.
- EPDM rubber embedded on the panel's seal top.
- Reinforced panels structure with galvanized steel strips in top and bottom ends of the panel.
- Great thermal and acoustic insulation.
- Inlay handle supplied with the door.

AVAILABLE FINISHES

- Inner side appearance: 0,5mm aluminium plate, pre-powdercoated and with anticorrosion treatment, thin ribbed pattern and "stucco" texture, pre-powdercoated White (RAL 9010).
- Outer side appearance: 0,5mm aluminium plate, pre-powdercoated and with anticorrosion treatment, large ribbed pattern and "stucco" texture, White (RAL 9010).

For any other RAL finish, please consult.
